A: Area for installing the power line.

B: Area for routing the water pipe. It is recommended that the water box is placed adjacent to the installation cavity, so that it can be accessed for servicing without uninstalling the appliance. If this is not possible, place the recessed water box adjacent to the water supply connection at the heights indicated in area A+B.

D: Niche depth dependent on kitchen design.

Note: The cutout for the dispenser unit must be horizontally and vertically aligned (centered).
